

Master thesis & industry internship

Are you interested in biosensors & diagnostics? Would you like to do your Master Thesis in a high-tech start-up?

Job description:

This project aims to optimize a novel biosensor for preterm birth diagnostics. It will give the students the opportunity to gain some expertise in biosensor development, experimental design and data analysis. It is also an opportunity to get a working experience in a highly interdisciplinary environment.

Your profile:

- Master student in biomedical engineering; biochemistry; biology
- Strong interest in diagnostics & medical devices

Micro-engineering, physics or chemistry students are also welcome. A strong motivation is required regardless of your background.

Start: preferably April 2023

Duration: from 5 months
