

# Master Thesis and Industry internship

***Are you interested in biosensors & diagnostics? Would you like to do an internship in a high-tech start-up?***

**Job description:**

This project aims to optimize a novel biosensor for preterm birth diagnostics. It will give you the opportunity to gain some expertise in biosensor development, experimental design and data analysis. It is also an opportunity to get a working experience in a highly interdisciplinary environment.

**Your profile:**

- Master student in biomedical engineering; biochemistry; biology
- Strong interest in diagnostics & medical devices

*Micro-engineering, physics or chemistry students are also welcome. A strong motivation is required regardless of your background.*

**Start:** preferably June - September 2024

**Duration:** from 5 months
